AIAA is the Leading Aerospace Publisher

AIAA has earned an international reputation as the preeminent publisher of cutting-edge aerospace journals and books, and as the most trusted source of aerospace technical content, dating back to the early 1900s. Over the past nine decades, AIAA and its predecessor organizations have published over 400 books and over 215,000 technical articles. AIAA's current publications include eight technical journals, a magazine, three book series, national and international standards documents, and a full-service, interactive website ([Aerospace Research Central](#)). For the most authoritative technical publications, look to AIAA.

About the speaker

Michele Dominiak is the Senior Vice President of Publishing and Education at AIAA. She has been an integral part of AIAA for over two decades, building her career in the organization's publishing department. During her tenure, she has witnessed and contributed to significant milestones, including the launch of two new journals and the organization's transition to e-first publishing practices across both its journals and books program. Today, she leads both the publishing and continuing education arms of the organization, bringing a wealth of institutional knowledge and expertise to her expanded leadership role.
